

Canurta Presents

THE HEALING PROJECT

A JOURNEY TO BETTER HEALTH

The Healing Project is community of early adopters for Canurta's innovative, safe and effective solutions. By joining the community, you will be supporting Canurta's development and have first access to our products as we release them.

OUR MISSION //001

Failures to resolve inflammation have led to a chronic disease crisis, with 3 out of 5 people worldwide dying due to chronic disease.

With the healthcare industry historically creating short-term solutions with long-term consequences, Canurta is developing better solutions. With a focus on research and development Canurta aims to bring novel, natural, and safe solutions to the market.

Our aim with the The Healing Project is to bring together supporters of Canurta's innovations to engage further and access more.

ENGAGE //002

Canurta is developing multiple community projects, at the forefront of this is our Xilas Syndicate story.

We want our community members to gain early access and provide feedback as we develop these projects to support our main Canurta products.

In addition, we're committed to helping those in need by using 1% of revenue generated by Canurta to support a charity of our community's choice.

ACCESS //003

Joining gives inside access to Canurta's research and development with updates through our exclusive community. Gain transparency into our research and learn more about what we're doing to ensure we produce the highest quality products.

As we develop our products, our community will be the first to access them directly from Canurta. This allows for greater savings for the people that support us as we develop our solutions with high precision.

THE XILAS SYNDICATE //004

The Xilas Syndicate Story is our first major community project. The Healing Project aims to bring stories to life to help bring the pursuit of science and technology driven solutions to the mainstream.

By collaborating and getting feedback from our community we will bring our story to life. While we continue to build and develop, below is a teaser of what's to come.

ORIGIN STORY //005

21-year-old Leon Velasco is a university student at Arcadia University and has grown tired of Sonhe Inc.'s dangerous pain killing solutions, but his research into the Xilas plant is not as straightforward as he'd planned..

Pursued and attacked by Sohne Inc. he's pulled into an interstellar adventure of unknown proportions. Leon and his newly formed team the Xilas Syndicate must travel to a far away plant in search of the catalyst to free people from addiction and suffering.

THE TECH //006

Using blockchain technology our memberships gain the ability to connect to various platforms and our websites with a single wallet connect.

When you join, you will receive your randomly selected Xilas Syndicate membership pass. This is your key and token to our community. The fight for a better tomorrow is here, join the mission today!
